-12-01 how would i go about getting my friends into mint? mattgyver: as usual, you'd tell them to come join the mint channel !mint | mattgyver mattgyver: Linux Mint is not a supported derivative of Ubuntu. Please seek support in #linuxmint-help on irc.spotchat.org EriC^^, thanks. i am already using linux mint and that is the reason i was curious. np EriC^^, ok so i guess this is a good place to ask. I have already installed ubuntu gnome and I am now wanting to install Kubuntu. I was going to just install the live cd, but i was wondering if there was any known issues? mattgyver: no issues i guess, it's your own installation mattgyver: make sure to disable fastboot though EriC^^, how would i go about doing that? mattgyver: there should be a bootloader options somewhere, it's up to you if it's a uefi thing it should be easy EriC^^, i am on a uefi laptop. This is an old EFI-1050-8.0-r2 which i am not sure how to setup mattgyver: that's odd, maybe it's not uefi then EriC^^, i am pretty sure it is, but i do not want to make that mistake again. try disabling secureboot and see if it boots EriC^^, ok, i am done on that end. brb Can I uninstall ubuntu-desktop without having to do a full re-installation of ubuntu? yes or does it make it hard to re-install or something? yeah, it'll make it a 82157476af
